

Science Experiences

ENCOUNTER SCIENCE PRODUCTIONS (ESp)

Registration is now open. Lab experiences will be presented by a science teacher holding an Ohio State Teaching License.

Who We Are

Encounter Science productions is an educational company that provides academic lessons and experiences that:

- engage the student in problem-solving
- build critical thinking skills
- improve research skills
- explore the natural world
- evaluate assignments and conclusions
- explain scientific content and data

Why Choose Us

Our Interactive Labs

We will create realistic lab settings that can include both virtual and in-person field experiences at your facility.

How It Works

The Presenter will provide a critical thinking warm-up and offer background information to the students. Next, students will engage in a series of activities (STEM) and complete activity sheets using data gathered.

Upon Completion

Parents will be given an assessment to evaluate if student learning has been achieved.

Our Experiences

Youth Expeditions (Field Trips)

Students and parents will meet the Presenter at the field trip site for an engaging hands-on activity. The Presenter will also act as a tour guide to answer essential questions.

Grade levels 4-12
